Brea, CA 92822-8000

Dear Ms. Dougherty,

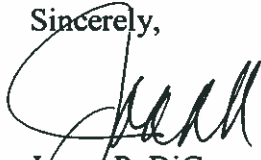

On behalf of the Board of Trustees of the Center for Excellence in Education, I would like again to express my heartfelt gratitude for your help in supporting the United States Biology Olympiad for this nation's young scholars who are our future leaders in biology based studies. Over 11,000 students registered for USABO 2010!

I am pleased to enclose thank you letters and photos from USABO finalists who attended the intensive two week session at Purdue University where US medalists were named, and the four member Team USA was selected to compete in the International Biology Olympiad in Changwon, Korea in July. For your information, students from California, Hawaii, Illinois and Michigan will represent our nation in the international competition.

Again, your continued support is crucial for the Center to offer the USABO opportunity to more and more outstanding high school students to help assure this nation's future innovative and competitive position in the global community.

With warm regards,

Sincerely,

Joann P. DiGennaro
President
